Office of the Executive Engineer, D
D h a r w a r, 11th February, 1948.

To

M/s. K. B. Chinchankar & Company,
Contractors, D h a r w a r.

Subject:- Agricultural College Buildings, Dharwar.
Additional two blocks of dining hall and kitchen.

Dear Sir,

Government has now accorded sanction for two more blocks of dining hall and kitchen and you are therefore requested to take up the work of these buildings also immediately. These works come under sub-work No.4 of contract.

2. The Sub-divisional Officer, Special Building Construction, has already been instructed to give you lining out of the buildings and I have noted on 6-2-1948 that you have already started excavating the foundations.

Yours faithfully,

(Sd/-) ....
Executive Engineer. Dharwar Dn.

--oOo----

W.B. P.W.D.

Submitted with refee. to the Office notes of the 23-12-51 and of the 10-10-51.

2. M/s K. B. Chinchankar & Co. Ltd, Contractors for the work of constructing bldgs for the College of Agriculture, Dharwar have represented in con: with their claim for extra payment of Rs. 39,324-6-0 for certain items of work. Their case is identical to the one of M/s S. B. Joshi & Co. who had claimed in con. with the work of Industrial School at Bijapur. Now that the final orders re: the claims of M/s S. B. Joshi & Co. have been issued, it is for consideration whether the S. E., S. C. (who is concerned in the present case also) may be asked to settle the claims of M/s Chinchankar & Co. in the light of the orders issued vide C.L. No. 7076/36-II-W, of the 28-12-51. If this is approved the papers may be shown up to the A & F. D & F. D before issue of orders

P.W.D.

The S.E, S.C, requests Govt. orders for the refund of the security deposit of the Contractors Messrs. K. B. Chinchankar & Co. in con: with the work of constructing Bldgs. for the Agricultural College, Dharwar.

P. 1/c.

2. In this con: perusal is requested of Extract para. 2 from the Ex. Engr., Dharwar Div's letter No. A-31(a), of the 21-4-52, forwarded by the S.E. S.C. It will be seen that there were two contracts for the works in con: with Farm & Dairy Bldgs., Part-I and one for Part II. These works were reported to be completed on the 30-9-50. The final bills thereof were, however, prepared in Dec. 1951 and paid to the Contractors in Feby. 1952. According to the conditions in clause 1 of the contracts the security deposit of the first two contracts is refundable after three months while that of the third one after six months from the date of payment of the final bill. The due dates for these refunds, as reported by the Ex. Engr. Dharwar Div., are as under:—

	Due Date
(i) Farm & Dairy Bldgs. Part-I under 69 for 1948-49	29-5-52
(ii) — do — under 70 — do —	29-5-52

~~It 2~~ Due Date

(iii) Farm & Dairy Bldgs, Part II 29-8-52

The Ex. Engr. has suggested that the question of refunding the deposit earlier than the dates noted above, may be considered since the contractors were not wholly responsible for the delay in this case.. A

3. The S.E. has no objection to refund the full security deposits in this case, as no defects are noticed in the bldgs. after Sept. 1950.

4. The S.E's proposal to refund the full security deposits may be approved in no consultation with the F.D.

5 It is for consideration whether the Ex. Engr's suggestion at 'A' above may be accepted. The F.D. may be requested to offer remarks on this point also.

Thro: DE (R+B)-I

19-5-52

It is surprising to note that final measurents for work completed in Sept 1950 were recorded in Dec. 51 i.e. after 1 year & 3 months this is very unsatisfactory. SDO's explt reasons for not seeing that the payment was done promptly by E.C. shd be obtained. S.E. shd make it clear as to when the contractor gave full info. re: variations. If he delayed to give information, he has to wait for his refund too.

Besides, it may be made clear by S.E. on what grounds extensions were granted to the contractor after completion of works i.e. for Sept 50 & Dec 51.

Dy. C.E.

W.B. RWD.

Submitted with refce. to G.L. No. BED 1852W, dt the 30-1-52. pp 47-53C pp 34C

2. These bks. relate to the claim* for Rs. 36,572-4-0, brought forward by M/s K.B. Chinchankar & Co. Ltd., for the extra quantities of work done by them in con. with the constn of bldgs for the College of Agrc., Dharwar. (Originally, the contractors' claim was for Rs. 39,324-6-0 vide their letter dt the 29-1-51). It has been decided to settle the contractors' claim on the analogy of a similar claim in con. with the constn. of bldgs for the Industrial School at Bijapur. The latter claim brought forward by M/s S.B. Joshi & Sons has been decided in the contractors' favour, vide G.L. No. 7076/36-II-W, dt the 26-12-51. The point at dispute in this case is the way the claims have been worked out by the contractors, M/s K.B. Chinchan

* Slip Z (9 sheets) put up

X Slip A Fin No 83/136 Bldg pp 2-3 + b.

$ Slip C Fin No 7076/36 II pp 145 3C to + b Corr. No 7076/36 II Slip $ + b

& Co. The main work consisted of 7 sub-works. The contractors have calculated the extra quantities of work separately for each sub-work. Secondly, the extra rates claimed by them are identical with those quoted by them for the work of Admin Block of the same College. Those rates were 27 % over 1938-39 rates + 100 %. The contractors argue that those rates may be treated as the market rates prevailing then, for purposes of settling his present claims. The contractors have justified the way of arriving at claims, in their note at P. 15-16 of the S.S.R.

3. The S.E., S.C. has submitted a detailed report at P. 47-53C in the matter. He is of the opinion that the sub-works should be grouped together for working out the total extra quantities of work done by the contractors. The S.E. has also proposed that the rates included in the schedule for the year in which the extra quantities were —

were executed shd be treated as the market rates prevailing then, for working out the total amount due to the Contractors towards their claim. It will be seen from the Contractors' note pp15-16C & the 5-5-52, that they are agreeable to the grouping of these subworks which had similar designs, drawings etc. The Contractors have also taken into account the constn. of two addnl. Blocks of Dining Hall & Kitchen as forming part of Sub-work No. 4. These Blocks were ordered to be carried out later on. The S.E. has asked for orders whether the quantities as for the addnl. two Dining Halls & Kitchens in question shd be considered as having been carried out in excess of the quantities in the tender & assessed accordingly. The claims of the Contractors, putting all the seven sub-works together, at the rates included in the schedule for the Dn. for the year, amount to Rs 1,340-15-0.

4. Orders are solicited

on

on the points raised in para. 10 of the S.E., S.C.'s letter under consideration. The F.D. may see the pts. wise for concurrence

Then B/F. (R) I

HD 12/9/52 BB

4/- There is a prov. of Rs 50,000/- under "Sl. C.W. Agric" during the current year for the work in con. with the Agrl. College at Dharwar.

W 12.9.52

5/- (i) As regards para 5(a) of the SE's letter, in view para. 6(a) of the SE's letter, the quantities of items of similar nature may be grouped together and the excess quantities worked out accordingly. p. 48 c/s b. 48 c/s W.S.

(ii) Para 5(b) of the S.E's letter:— Since the Contractor ~~agreed to~~ carried out the work of the two additional dining halls and kitchens and did not specify the rates they would charge before the commencement of the work, it appears that ~~that~~ they were agreeable to the rates in the contract for the similar work. ~~The SE~~ It would have been better if the EE had got this ~~in~~ cleared in writing. The two dining halls and kitchens may be considered as separate subworks covered by the same contract conditions. p. 48 c/s W.S.

(iii) Para 5(c) of the S.E's letter:— As regards rate to be paid for the quantities in excess of 20% of the tendered quantities, they are to be assessed on the basis of the market rates or at rates mutually agreed upon vide Rly. Bd's opinion. The EE is of the opinion

X file 7036/56-I p. 209.

that the schedule rates of his division for the period in question is the proper guide for deciding the claims. The Contractors however do not accept the schedule of rates. From the schedule of rates mentioned against some of the items, it is seen that they are lower than the tendered rates. Hence for the reasons stated in para 3 of his letter, the S.E. considers that the schedule rates should be held to be the market rate then prevalent and the claim should be settled on that basis. Perhaps S.E's opinion may be accepted.

2. File No. 7056/36 III as slip F put up as directed.

22/9/52

V.J.

CE(R&B)

The contractor for the work of constructing buildings for the College of Agriculture, Dharwar, has claimed market rates for extra quantities over 20% of the tendered quantities. Similar cases have been considered before., viz., Industrial School at Bijapur and B.J.Medical School, Poona ' ...

Poona (Hostel Buildings). So far as payment at market rates for extra quantities is concerned, there appears to be no objection. The question posed now is (i) whether the quantity should be taken for all the items of sub-works grouped together and extra paid or (ii) whether certain sub-works should be grouped together where works are of a similar nature, both in quality and in type viz. with single storey or double storey or first class or second class, etc., or (iii) whether each sub-work should be treated separately.

2. Normally, it would appear correct to group together all the quantities as the tendered contract is one and the formation of sub-works are only for the convenience of the executive staff, but in this case, the various sub-works are of different types, both in quality and in type of structures. Besides, rates for similar items for different sub-works do not appear to be the same, e.g., for 1:4:8 cement concrete for foundation, tendered rate is Rs.83/- for Biology Block whereas it is Rs.80/- for Hostel for Students, Dining Hall, Kitchen, etc. Hence, it may not be proper to group together all such items. It appears better to consider grouping of the items according to the type of structures and according to the tendered rates. This is for orders.

3. The second question is what rates should be adopted as market rates. The rates to be worked out could be (1) tendered rates, (2) Scheduled rates, and (3) prevailing market rates.

Regarding (1), this question does not arise because the contractors are to be paid for extra quantities at market rates as already pointed out and agreed to (see p.121 of file No.7056/36-W-III) in the case of

Hostel ...

Hostel Buildings for B.J.Medical College at Poona.

Regarding the scheduled rates, we cannot strictly call them market rates as it is clear that the tenders are received in these cases far above the schedule of rates. Besides, the market rates would be applicable to the places of execution, and the general rates for the Division -- as schedule of rates is -- may not be termed strictly as market rates. If this view is correct, the market rates would be the rates at which open tenders or competitive tenders have been received during the period. It appears that administrative block work was let out to the same contractor at that time. Normally, this can provide the background for market rates, provided shows a competitive rates but the objection is that this building has got architectural features, is a three-storied building and requires highly skilled labour. I presume, architectural features were separately itemized in the tender, as it has been usually and regarding the other two points, probably the S.E. could contact the contractor and arrive at suitable rates after making allowance for these factors. I would, therefore, propose as under:-

B. The quantities should be grouped together according to the rates of the items, being the same in the tender, and according to the types of buildings (single-storied, double-storied), class of work, i.e., servants' quarters should be considered separately as compared to the main building.

The

The rates should be the market rates, i.e., competitive tendered rates received at the time this work was in execution. In case the administrative block is the only work of this competitive type, the S.E. could arrive at the rates to be paid after making allowance for the difference in actual requirements, i.e., architecture, more storied, etc. In this case the orders issued in G.L. No.7056/36-III-W of 18-3-50 in file No.7056 and the orders issued in G.L. No. 7076/36-II-W of 28-12-51 are put up for perusal.

3. The draft put up may be issued.

S.P. 18/6/53

18/6/53

AS. (11)

Submitted with reference to G.L. dt. 20th March 1953 at p. 67/cs.

2. The office note dated 25-9-52 at pps. 11-20 explains the case M/s. K.B.Chinchankar & Co., Ltd submitted a claim for Rs. 36,572-4-0 for the extra quantities of work done by them in connection with construction of buildings for the college of Agricultu Dharwar. The S.E., S.C. was asked to work out the amount of claims of the contractors on the lines detai in G.L. dated 20th March 1953 at page 67/cs.

3. The S.E., S.C. has now furnished a detailed report in the above matter the various sub-works have been grouped in three Groups according to the type of buildings. Within these groups, the quantities have been grouped together according to the tendered rates of the items being the same.

4. In para. 3 of his letter, the S.E. has detailed as to how the rates have been calculated. Since the Administrative Block of this College was not the only work carried out at that time (as the work for the Botany Bldgs. of the Karnatak College was also carried out at the same time), the rates proposed to be paid to the contractors have been decided with reference to the average of the rates offered for the two works mentioned above. Where, however, there are no rates for any item in the two tenders, the rates in the schedule of the rates have been adopted as the current market rates.

5. The basis of estimation of the claim adopted by the S.E. is generally in accord with the lines detailed in the G.L. at page 67/cs. According to the estimate, the amount of the claims comes to Rs. 20,311/- against the claims of the contractors at Rs. 36,572-4-0 (corrected by the S.E. from the original claim of Rs. 39,324-6-0).

6.....

I. According to specification and as decided by R.L.A. the contractor can claim higher rates than tender ones. However according to clause 14 of printed specifications the contractor has to carry out the work at the same tendered rates when there is alteration or addition to the original specifications, design or drawings. Pl. see side lined portion A at p. 57 c.s. Numerous changes were introduced in the original project during construction. Hence if the clause 14 is allowed to operate and also if the excess in quantities is only due to changes introduced at the time of execution, perhaps the contractors have no claim. If appd. the S.E. may be asked to verify this and report to what extent the excess is due to changes in the original design.

II. Grouping Pl. see statements at p. 75-78. It will be seen that quantities of the same items in some groups or sub-works are more and in other group or groups ~~for sub work in case of difficulty it is~~ there are less than the estimated + 20%. ~~If the separate groups are to be considered then the contractor will have claim for the excess. If~~ Hence if all the groups are considered as one work the net excess will be much less for example for item (i)

Excess quantity for group I	45,166 cft.
" " " " II	26,940 cft.
Total . . .	72,106 cft.

In group (3) quantity for same item done is less than the estimated + 20% by . . . . - 23,017

Thus if all the 3 groups are combined together the contractor has a claim only for 49,089 cft.

In some cases rates of the items of each subwork in the same group are different and in such cases the S.E. has treated the excess of each subwork individually thus not combining the excess in each group. This results in ~~pay~~ payment contractor's claim for which there may be little or no claim at .....

at all, had the quantities of the same item of sub-works combined under each group.

In this connection pl. see para. 6 at p. 48 c.s. (of the S.E.'s letter). Also pl. see para. 2 at p. 16 ante. It may be noted that rate already paid (column 5) is perhaps the tendered rate and it appears that it is same for many of the items of various groups. In case where the rates differ the difference is not much. Hence perhaps the S.E's view may be accepted and the net excess in quantities if appd. may be worked out ~~on the basis~~ by combining quantities of all groups. In cases where the rate of various subworks are different ~~rate already paid may be consider as~~ av: rate of rates of various subworks already paid may be worked out - extra to be paid shd. be considered above it.

x at para 6 Pl see B'n p. 17 and P. 48 c.s. D.S.'s noting on p. 25 and agreed to by CE. Accordingly SE was asked vide S.L. at p. 67 c/s. The mode of working out excess quantities may not now be changed. JPJ

III Rates.

Pl. see para.(3) of S.E's letter at p. 79 c.s. two buildings were under construction at the time of construction of above works viz. Administration block (2) Botany building.

The S.E. has proposed to pay the contractor on the basis of av: of the rates for above two buildings. The av: rate at which the contractors are proposed to be paid work out much higher than the rate of Botany building. Probably admn. block is a entirely different structure with architectural features etc. as its rates are much on the higher side. Perhaps if the excess is to be paid the contractor should be paid at the rates at which botany Bldg. was constructed at that time.

Pl see A' on p. 20 and agreed to by CE. Accordingly SE was asked to prepare rates vide S.L. @ p. 67 c/s. The rates prepared by SE may be accepted JPJ

The above points are for consideration and if agreed to or otherwise the actual claim of the contractor would be worked out on these basis

Office of the R.L.A.

It appears that Messrs. K.B.Chinchankar & Co. were given a contract for the construction of the various buildings of the Agricultural College, Dharwar. The work consisted of seven sub-works. They have executed these works and according to the contract their bills have been settled. They have now claimed for the extra quantities of work done in respect of these seven sub-works and have calculated these extra quantities separately for each sub-work on the basis of excess over 20 per cent. as provided in clause 5 of the General Specification. The Superintending Engineer proposes that these extra quantities of work should be calculated on grouping these sub-works into three groups for working out the total extra quantities of work done by the contractors. The contractors have claimed the rate for these excess quantities of work on the basis of the tendered rates for the administrative block, while the Superintending Engineer recommends that they should be paid at the tendered rates for the construction of the botany building of the Karnatak College which work was also executed at the same time. From the report of the Superintending Engineer dated the 18th August 1952 it appears that the rates in the tender for the administrative block of the Agricultural College were only 27 per cent. over 1938-39 rates, plus 100 per cent., and the lowest tender received in response to a public invitation for the botany building of the Karnatak College, Dharwar, was 21.43% above the estimate (1938-39 plus 100% increase) but the rates of the former were 36.33% abovethe estimate. In view of these facts, the question raised for the Remembrancer of Legal Affairs's consideration is whether the grouping proposal made by the Superintending Engineer is correct and whether the rates applied to excess

quantities, namely, the botany building rates rather than the average rate of the two works would be reasonable.

Although the contract was for the construction of all the seven sub-works of the Dharwar Agricultural College, these seven sub-works are separately mentioned in Schedule B. The quantities required for execution of each work, the tendered rates and the actual amount according to the estimated quantities are also separately mentioned. It appears from Schedule B that the rates in respect of each sub-work also differ. Clause 5 of the General Specification provides :

> "Quantities given in the tender are approximate and may vary within twenty per cent. Excavation for foundation will be according to actual strata to be met with. The contractor shall have no claim for compensation on account of any variation in the quantities."

Clause 37 of the contract provides :

> "Quantities shown in the tender are approximate and no claim shall be entertained for quantities of work executed being either more or less than those entered in the tender or estimate."

Similar provisions were considered by the Remembrancer of Legal Affairs in his opinion No. 8770 dated the 4th August 1949, where he opined :

> "This clause (meaning Clause 5 of the General Specification) will have to be read with condition 37 of the Conditions of the Contract and reconciled. It would, therefore, be clear that the contractor would certainly be entitled to compensation if the quantities used for the excavation of the work are in excess of 20 per cent. of the quantities specified in the Schedule. This compensation will have evidently to be assessed on the basis of the marke

rates or at the rates mutually agreed upon."
If the contract is considered for executing the whole work as one unit, then no grouping as proposed by the Superintending Engineer would be legally feasible and the excess quantities will have to be calculated on the basis of all the seven sub-works as one unit. If the seven sub-works are to be considered as separate works to be executed as per terms of the contract, the excess quantities will have to be calculated on the basis of each sub-work as a separate unit. Consequently, the grouping proposed by the Superintending Engineer would be inconsistent and would not be proper. In view of the fact that each sub-work is separately mentioned in Schedule B and the estimated quantities of work are also separately mentioned and the rates in respect of each sub-work also differ in some respects, it would be reasonable and proper to hold that each sub-work is to be considered as a separate unit for the purpose of assessing the excess quantities for the purposes of clause 5 of the General Specification read with clause 37 of the contract.

The next question for consideration is what should be the rate for the excess quantities of work. In the aforesaid opinion of the Remembrancer of Legal Affairs it has been stated that the compensation for excess quantities of work will have to be assessed on the basis of the market rates or at the rates mutually agreed upon. The contractor does not agree to the rates proposed by the Superintending Engineer. The only alternative would, therefore, be to consider the market rates. The contractor has been claiming the rates at which he executed the administrative building of the Agricultural College, while the Superintending Engineer proposes the average between the rates of the two works, namely, the administrative building of the

Agricultural College and the botany building of the Karnatak College, but the Public Works Department proposes that the rates of the botany building of the Karnatak College would be reasonable for the purpose. Which of these rates would be approximately equal to the market rates is a question of fact which the administrative department may decide for itself.

Extract para 2 from the Executive Engineer, Dharwar Division's letter No.A.31(a) dated the 21st April 1952, regarding: Constructing Buildings for the College of Agriculture, Dharwar - Pending issues in connection with the --

---

Para 2:- The works viz. Farm & Dairy Buildings Part I and Part II were reported to be completed by the Deputy Engineer, Dharwar on 30th September 1950. The final bills were prepared in December 1951 and paid to the contractors in February 1952. For the delay in recording the measurements the Deputy Engineer has explained that the work of recording measurements being of magnitude and the items being numerous the measurements could not be recorded earlier. Moreover, the amalgamation of the Special Buildings Construction Sub-Division to Dharwar (B & R) Sub-Division with the other numerous other works to be attended to has also contributed to some extent to the delay. On the contractor's part, the details of materials used were not given by the contractors as required by the conditions which also added to the delay.

(b) There are two contracts for Farm and Dairy Part I and one for Part II. According to the conditions in clause I of the above contracts the security deposit of the first two contracts is refundable after three months and that of the third after six months from the date of payment of the final bill and accordingly it is due for payment on :-

Farm & Dairy Part I Tender 69 for 48/49.	29-5-1952.
-do- I -do- 70 -do-	29-5-1952.
-do- Part II- B-2/DD.SE. 49/50.	29-8-1952.

Since the contractors were not wholly responsible for the delay in this case, the question of refunding the deposit earlier than the dates as noted above may be considered. It is however, ascertained from the Deputy Engineer, that no defects are noticed in these buildings and there is no objection to refund the deposit.

Farm & Dairy Buildings Part I & II.
Refund of security deposit for the --

P.1/65

I enclose herewith an extract para 2 from the Executive Engineer, Dharwar Division's letter No. A-31(a) dated the 21st April 1952 and in view of the circumstances explained therein request that orders to refund the security deposit of the contractors Messrs. K.B.Chinchankar & Company Ltd., Poona, may kindly be issued early.

2. In a similar case orders to refund 50% of the security deposit were issued vide G.B., P.W.D. No. BED.1851-W dated the 20th July 1951. As the contractors are pressing for the refund of their security deposits saying that when they had completed the works in September 1950, they are not responsible for the delay in payment of the bills and as no defects are noticed in the buildings after September 1950, I see no objection to refund the full security deposits in this case and request necessary orders may kindly be issued in the matter early.

K.B.Chinchankar & Co.Ltd. Poona No.4.

5th May, 1952.

Points with regard to 20 % Claim as discussed with the Superintending Engineer, Southern Circle, Belgaum, in the meeting with the Executive Engineer and his staff at Belgaum on the 25th April 1952.

(i) Grouping of quantities under various items of different Sub-Works.

Grouping quantities of various items of all Sub-works for the purpose of arriving the excess in quantities over 20% than those estimated and entered in various schedules of different Sub-works is not acceptable to us due to :

(a) We have tendered our rates separately for each Sub-work

(b) Each sub-work has it's own schedule "B" and a separate memorandum showing items of work to be carried out.

(c) Quantities for each sub-work are calculated and entered in column (2) of the memorandum, are marked as " Quantities estimated but may be more or less " and it is becuase of this uncertainty of quantities, Department has made provision to vary the quantities upto 20 %

(d) Each Sub-work has it's own drawing, designs and instructions for executing the work.

(e) As regards the plea of the Executive Engineer that all the sub works have only one set of specifications, it is needless to say, that they are common for all the works in the state, be it a bridge, culvert, road, servants' quarters, bungalow or a palace. This plea, therefore, is not acceptable.

However we are prepared to agree to grouping of those sub-works, where, the buildings have same drawings, design instructions. Such grouping may be made for sub work Nos. 1 and 2; 5 and 6.

(ii) Extra rates claimed for various items where quantities have exceeded more than 20 %

We have claimed extra rates over the tendered rates because of the following facts :

(a) Rate of cement at the time of tendering was Rs.65/- per ton f.o.r. Dharwar and this increased to Rs.87/8/ only. from 1-1-48. Time of acceptance of the tender was June, 1947.

(b) Rates of petrol, tyres, tubes, shell oil and truck spare parts increased by 20 to 25 % from June 1947 to Dec. 1948.

(c) On account of increased work, timber required also increased, and the Govt. increased rate for this extra quantity by 40 % over what was our agreed rate when tender was accepted.

(d) Labour wages increased by 15 % as their cost of living increased.

(e) Petrol coupons were not use to be received in time, being delayed by a fortnight per month on an average. This hampered our carting of materials such as bricks from Khanapur, Sand from Alnavar and Harbeddi and timber from Dandeli, all having lead from 20 to 45 miles. As a result, Work scheduled to be completed by 30-10-48, prolonged till 31-12-50. All this increased our idle labour cost and establishment charges.

(f) Work of all most all buildings had to be done and finished in parts as the Agricultural Dept.wanted urgent accommodation for their class rooms, laboratories and hostels as otherwise they would not get affiliation to the college from the University.Thus we had to concentrate on specific parts to our inconvenience from a business point of view and which increased our working cost of various items.

(iii) The extra rates claimed by us are identical with those quoted by us for the work of the Administrative Block a work similar in nature and being in the same area very close by.The rates as quoted, are, 27 % over 1938-39 + 100 % a very fair and reasonable percentage than that of about 44 % over 1938-39 + 100 % quoted by the lowest agency for a laboratory work of the Karnatak College at Dharwar,at the time when we tendered for the Ad.Block,although the latter has roads,water supply, local labour available in town,carting of P.W.D.Material, very near.You will thus find that our rates are very competitive and may be safely taken as the market rates then ruling.

(iv) Rates quoted by us for the Farm and Dairy Buildings are not comparable with the buildings of the First stage contracts and thus cannot be said to be market rates for the increased quantities since these former structures are built up of local bricks,jungle wood, C.G.I.sheets,Lime mortar and all most all materials supplied by the Department for which we were not required to make special efforts to procure them.All the timber has been supplied by the Department.Besides,these are very simple structures requiring no special type of supervision.A mere glance at these buildings so called - will convince.

(v) Extra rate of Excavation.

Rate of excavation as claimed by us may perhaps appear to be a slightly higher one. But a study of the circumstances under which we executed the job will convince you.It is as under :-

(a) Excavation was ordered to be commenced in the midst of the monsoon although we had no our programme of it as there were no approved quarries nor bricks available from Khanapur for the superstructure work.Correspondence with the local officers will bear out these facts.

(b) We,however,did agree to the desire of the Officers, but monsoon being very heavy at Dharwar and all the work being under the foot of the Yettingudda Hill,trenches for foundation so excavated,use to get filled up with rain water, ground being slopy all along and all excavated stuff in the trenches use to get muddy and difficult to take out of the pits.The labour could not work in monsoon and were required to be paid extra before they could be persuaded to work.We had to pay them heavily.

(c) We quoted similar rates as claimed by us for the work of the Administrative Block for the excavation work, knowing fully that we will be required to work on excavation in monsoon.The rate asked for for the increased quantity is thus commensurate and reasonable.

Ref: No.DR-243

Poona 4
14th July 1952.

The Superintending Engineer,
Southern Circle,
BELGAUM.

Sub: Constructing Buildings for the College of Agriculture- Dharwar- First Stage Claim of Rs. 39324--6-0 towards the extra quantities of work executed for ...

Dear Sir,

In continuation of our Le.No.DR-227 dated 5-7-52, addressed to your kindselves, we further beg to state as under :-

i The rates claimed by us for payment of extra quantities are quite fair and reasonable and were tendered by us competitively to secure the work since we were already established on the site executing the first stage work. This we had made it very clear at the outset in our Le.No.450 of 17-6-48, accompanying our tender for the Administrative block work;

ii. As the lowest rates received by open competition on the Botany Building of the Karnatak College, Dharwar being 17% higher than those of the Administrative Block rates accepted by the Government, the Executive Engineer, Dharwar Division, Dharwar, approached us for taking the above work although it was a ground storyed structure, vide copy of the Le.No.A-31(a)/1 of 21-8-48

You will thus find that the Executive Engineer, Dharwar determined, our ratesof the Administrative Block as accepted by the Government, to be the then prevalent market rates at the time when we actually exceeded the quantities while executing.

3. On account of increase in the price of cement during the course of execution of work, from Rs. 65/- to 85/- per ton and an increase of 40% in the price of timber for the increased quantities, we alone lost Rs.36,000/- only which fact, we request, needs your kind and sympathetic consideration while forwarding our case to Government.

Thanking you,

Yours faithfully,

for K.B.Chincharkar & Co.Ltd.

Analysis of Rate.

1) Excavation in soil and murum (lead 300'),
rate for 100 cft.

(a) Rate as per Divisional Schedule (Lead 50') per 100 cft. : Rs. 2-10-0

(b) Add extra labour for extra lead of 250'. 1.20 x 22 Annas. = Rs. 1-10-0

Total Rate .. Rs. 4-4-0

2) Excavation in shale (Lead 300')

3 coolies for excavation at Rs.1-6-0 per coolie. = Rs. 4-2-0

Conveyance charges for lead of 300' 1.4 x 22 Annas. = Rs. 1-15-0

Total..... 6-1-0

or Say Rs. 6/-

Executive Engineer, D.Dn

Analysis of rate for

14) 1½" Thick country ~~mkx~~ cut teak wood windows fully pannelled 2nd class with 5"x3" frames, iron fixtures and fastenings, oiling etc. complete.

One window 3'-0" x 4'-0" = 12 sft.

(a) Teak wood for frames
18' x 5" x 3" = 1.88 cft.
@ 12/- including labour = 22-9-0

(b) Teak wood for shutters.

styles 26' x 3" x 1½" = 0.81

Panels 4 x 1'-9" x 1'-3"x1"=0.73.

Total cft. 1.54 cft

@ 16/- per cft including labour = 24-10-0

(Note: Teak wood has been supplied to the contractor by the Forest Department at concessional rates).

(c) Iron fixtures & fastenings. = 5-12/-

(d) Oiling & sundries. = 6/-

Total Rs. = 58/15/-
say 59/-
for 12 sft.

Rate per sft comes to Rs.4-14-8
say 4/15/-

15) 1½" thick (1:2:4) Indian patent stone flooring over 4½" thick 1:3:6 C.C. including smooth finishing, curing etc.

Rate for 1:3:6 C.C,

(a) 100 cft metal 1½" to 2" gauge on quarry.
@ Rs.18/- per 100 cft as per schedule = 18-0-0

(b) Conveyance charges for 1½ miles lead
@ Rs.24/8/- per 100 cft. = 24-8-0

(c) 50 cft sand @ Rs.30/- per 100 cft. = 15-0-0

(d) Cement 13½ bags @ 4/8/- per bag. = 60-12-0

(e) Labour for mixing & laying 6 coolies
@ Rs.1/4/- = 7-8-0
1 bhisti @ Rs.2/- = 2-0-0

(f) Sundries = 1-4-0

Total Rs. 129-0-0

P.T.O.

Rate for 100 sft.of patent stone.

(a) C.C.1:3:6 - 4½" thick = 37.5 cft.
@ Rs.129/- per 100 cft. = 48-6-0

(b) C.C.1:2:4 (Patent stone) - 1½" thick = 12.5 cft.
@ Rs.2/8/- per cft. = 31-4-0

(c) Add extra quantity of cement ½ bag for finishing at Rs.4/8/- per bag. = 2-4-0

(d) Extra labour for finishing = 2-0-0

Total Rs. 83-14-0

say Rs.84/- / per 100 sft.

(6) Teak wood queen post trusses of span 25' including iron straps & oiling.

(a) Teak wood 14.5 cft @ Rs.14/- per cft.including labour. = 203-0-0

(Note: Teak wood has been supplied to the contractor by the Forest Department at Concessional rates)

(b) 2" x ¼" iron flats for straps ½ cwt.at 25/- per cwt. = 12-8-0

c) Bolts & nuts. = 7-8-0

d) Hoisting = 15-0-0

e) Ciling etc. = 5-0-0

Total Rs. 243-0-0

Rs.243/- for each trusses.

jmb.4/7.

Executive Engineer,D.Dn,

Letter.

No.G-34/DD.

Office of the
Supdg.Engineer,Southern Circle,
Belgaum: 18th August 1952.

From

The Superintending Engineer,
Southern Circle, Belgaum.

To

The Chief Engineer,
Public Works Department, BOMBAY 1.

SUBJECT: College of Agriculture, Dharwar:-
Claims of Messrs. K.B.Chinchankar & Co.
contractors in connection with the ---

REFERENCE: Correspondence resting with this office
No.G-34/DD-1 dt. the 9th July 1952.

pp 1-2

2. As ordered in Govt. Letter (P.W.D) No.BED-1852-W dated the 30th January 1952 the claims of Messrs. Chinchankar & Co. were reviewed in the light of the orders issued regarding the Industrial School at Bijapur and as a result I submit the following report in that connection.

3. Para 5 of the General Specification attached to the contract of Messrs. K.B. Chinchankar & Co., for the work of constructing buildings for the Agricultural College at Dharwar reads as under :-

" Quantities given in the tender are approximate and may vary within twenty percent. Excavation for foundation will be according to actual strata to be met with. The contractor shall have no claim for compensation on account of any variation in the quantities"

This wording and the wording in the Specification of the Contract of Messrs. S.B.Joshi & Co., for the Industrial School at Bijapur being the same, Messrs. K.B.Chinchankar & Co. are entitled to compensation for execution of the work in excess of 20 % of the quantities specified in Schedule B and the compensation is to be assessed on the basis of the market rates or at the rates mutually agreed upon, vide G.L. (P.W.D) No.7076/36-II-W, dated the 28th December 1951.

7076/36-II
pp 145-6

4. In the case of the Agricultural College at Dharwar, there were the following seven sub works:-

(a) Sub work No.1: Agronomy & Chemistry block
(b) " " No.2: Biology block
(c) " " No.3: Hostel for students;
(d) " " No.4: Dining Hall & Kitchen;
(e) " " No.5: Principal's Bungalow
(f) " " No.6: Hostel Superintendent's Bungalow
(g) " " No. 7: Five blocks for servants each accommodating six servants.

Separate schedules B for each Sub-work were prepared and attached to the contract in question bearing No.B-2 (Yettingu... for 1947-48. According to the contract all the works referred to above were to be completed by the 1st May 1948 Subsequent to the signing of the contract documents on 3-5-47

the

the Executive Engineer, Dharwar Division under his No.DD-1 dated the 11th February 1948 asked the contractors to take up the works of the two additional blocks of Dining Hall & Kitchen as forming part of Sub-work No.4, as sanctioned by Government in G.L. Agricultural & Rural Development Department No.1014/ 3477-B dated the 26th January 1948.

5. In connection with the claims of the contractors for execution of the work in excess of the quantities specified in the Schedule, the following points have arisen :-

(a) How the excess quantities should be worked out whether on the basis of all the sub-works grouped together or on the basis of each sub-work taken separately?

(b) Whether the quantities as per the additional two Dining Halls & Kitchens entrusted to the contractors subsequently should be considered as having been carried out in excess of the quantities in the tender and assessed accordingly

(c) What should be the rates to be paid for the extra work over 20% of the tendered quantities. ~~M/s~~ M/s K.B.Chirchankar & Co. have put in their claims treating each sub work separately and the quantities of the additional dining halls and kitchens as being in excess of the tendered quantities specified in Schedule B advancing the following reasons in support.-

(i) They have tendered their rates separately for each sub work;

(ii) Each sub work has its own schedule B and a separate memorandum showing items of work to be carried out;

(iii) Quantities of each sub work are calculated and entered in Column 2 of the Memorandum and are marked as "quantities estimated but may be more or less" and because of this uncertainty of quantities the Department has made provision to vary the quantities upto 20 %

(iv) Each sub work has its own drawing, design and instructions for executing it;

A copy of note dated 5th May 1952 from the contractors received in this connection is attached from whihh it will be seen that they are however, prepared to forgo the grouping of these sub works which have similar drawings, designs and instructions i.e. sub works Nos. 1 & 2 and Sub-works 5 & 6

6. With regard to 5(a) above, the Executive Engineer, Dharwar Division is, however, of the opinion and I agree with him that on careful reading of Para 5 of the general specification attached to the contract, treating each sub-work as a separate one does not stand to reason nor would the contractors appear to be legally entitled to a claim on that basis as all sub works together from one tender and were carried out at one spot and extra rate to be paid for an item will be the same irrespective of the sub-work. Separate schedules, drawings etc. are prepared for the convenience of the Department as also of the contractors so that cost of each structure is known at any time and this is no ground for considering each ~~work~~ Sub-work separately for assessing claims for quantities in excess of 20 %.

(b) ...

(b) With regard to 5(b) above, the Executive Engineer has stated that it was mutually agreed by the Engineer-in-charge and the contractors that the additional two dining halls and kitchens should be carried out at the same tendered rates as per clause 14 of the agreement requiring that the additional work to be carried out on the same conditions and the same rates as are specified in the tender and as such the quantities of items relating to the two additional Dining halls and kitchen do not legally become extra for purposes of excess over 20 % as they virtually form a new tender on the same conditions. But in the absence of a written statement from the contractors agreeing to carry out the additional Dining Halls and Kitchen at the same rates as specified in the contract, I think that in view of the opinion expressed by the Remembrancer of Legal Affairs in his U.O.R. No.18308, dated the 20th November 1951, accompanying G.L. No. 7076/36-II-W, dated the 28th December 1951, clause 14 of the agreement does not come into operation since the additional quantities were not due to any alterations or additions to the original specifications, drawings or designs. Claim for additional work done in respect of the additional two Dining halls and kitchens will have, therefore, to be admitted with reference to the quantities in the agreement. Accordingly one statement (No.1) showing the quantities to be executed as in the agreement is submitted herewith.

7. As regards the question of rates, they could not be mutually agreed upon as there has been difference of opinion between the contractors and the Executive Engineer as to what should be considered as the then prevailing market rates at the time the excess quantities were executed. The contractors have submitted their claims amounting to Rs. 36,572--4-0 as per the accompanying nine sheets on the basis of their rates for the work of Administrative Block of the Agricultural College quoted in July 1949 which rates they insist should be taken as the market rates prevailing at the time they carried out the excess quantities in respect of the first stage buildings of the Agricultural College referred to in Para 4 ante. In support of this, the contractors argue that

(i) The rates in the tender for the Administrative Block were only 27 % over 1938-39 rates plus 100 % and they were considered reasonable by Government when they accepted the tender vide G.L.,P.W.D.No. 8315/36-W, dated 20-8-1948.

(ii) The lowest tender received in resporse to public invitation for the Botany Building of the Karnatak College Dharwar was 17 % higher than those of the Administrative block, although the former is in the town where all facilities are available.

In connection with the argument No.(ii) of the contractor, it is brought to notice that as reported in this office No. G-34/DD, dated the 13th November 1948, competitive quotations were subsequently obtained by negotiation and the rates of the lowest tenderer for the Botany Buildings were 21.43 % above the estimate (1938-39 plus 100 % increase) while those of Messrs. K.B.Chinchankar were 36.33 % above the estimate. The Executive Engineer, Dharwar Division reports that the tender of Messrs. K.B.Chinchankar & Co. at 27% over the estimated cost of the work of the Administrative Block of the Agricultural College was recommended for acceptance as being reasonable because of the three tender forms issued only one of Messrs. Chinchankar & Co. was received. He also adds that the acceptance of a tender on a particular date would mainly depend upon (1) urgency and necessity of work (2) Availability of contractors (3) Lack of adequate resources of men and machinery & (4) the circumstances then prevailing The above points were mainly taken into consideration and also .....

also it was considered that introducing a second agency at the same site of work was not desirable from the point of progress of the work. So I agree with the Executive Engineer that the rates accepted under such circumstances cannot be held as true market rates. Moreover the acceptance of any tender for a particular work is decided taking into consideration mainly the total cost as a whole and not the rates for individual items which may in some cases be high and in other cases low as that is how a contractor some times gambles in tendering for a work. Moreover the Executive Engineer states that there is a difference in the type of building, kind of construction and nature of treatment between the Administrative Block and the work in question as will be seen from the following :-

(i) The administrative Block has architectural features which are absent in the buildings in question;

(ii) The Administrative Block is a three storeyed structure whereas the buildings in question consist of 12 single storeyed structures and only four double storeyed structures;

(iii) The Administrative Block mainly required highly skilled labour whereas the buildings in question required only normal skilled labour locally available.

The Executive Engineer is, therefore, of the opinion that the schedule of rates of his Division for the period in question is the proper guide for deciding the claims of the contractor in question as he has pointed out the following disparity between the rates demanded by the contractors and market rates as worked out as per the schedule of rates of his Division for the period.

Item	Tendered rate	Market rate i.e Schedule rate	Rate now demanded by the contractor *
1)Excavation in soil & muru,	3--0-0	4-12-0	15--0-0
2) Plinth filling	4--0-0	3-12-0	9--0-0
3) Glazed ventilators	6--8-0	6--0-0	9--0-0
4) Cement plastering	25--0-0	27--0-0	30--0-0
5) Cement concrete 1:2:4 for beams etc.	2-8-0	2-6-0	3--8-0
6) Cement concrete 1:2:4 for floor	2--8-0	2--8-0	3--8-0
7) Valley gutters	6--0-0	7--5-0	8--0-0
8) Teak wood queen post trusses 26' span	250--0-0	250--0-0	325--0-0
9) Badami stone steps	4--8-0	4--8-0	6--0-0
10)Architectural pedements	3-12-0	3-12-0	5--0-0
11) Cement concrete 1:2:4 general	2-12-0	2--8-0	3--8-0
12) Rain water down take pipes	1--8-0	2--0-0	3-12-0
13) 1½" thick panelled doors 1st class	5--0-0	5--8-0	6-12-0
14) Cut teak wood	16--0-0	15-12-0	18--0-0
15) Teak wood cupboards 2½ X 4'	55-0-0	60--0-0	90--0-0
16) Eaves gutter	1-8-0	2--8-0	3--8-0
17) Teak wood shelving	3--0-0	2-11-0	4--0-0
18) Architectural plaster	2--8-0	2-5-0	5--0-0

Item	Tendered rate	Market rate i.e.Schedule rate	Rate now demanded by the Contractor
19) Indian type water closet	200--0-0	200--0-0	275--0-0
20) Panelled windows 2nd class	5--0-0	4-15-0	6-12-0
21) Glazed windows 2nd class	4-12-0	4-12-0	7--0-0
22) 1½" I.P.Stone flooring over 4½" C.C. 1:3:6	70-0-0	84--0-0	100--0-0
23) Queer Post trusses 25' span	250--0-0	243--0-0	325--0-0
24) R.C.C.1:2:4 for lintels &c		4--6-0	7--0-0
25) B.B.Superstructure		130--0-0 with table moulded bricks.	140--0-0

* However during personal discussion the contractors have stated that they were prepared to reduce the rates for S.No.1 & 2 to Rs.13/- and Rs.8/- respectively.

8. The Executive Engineer has also pointed out as below vast differences between the rates accepted by Messrs. Chircharkar & Co. contractors for such work as extra items on this same work during the same period and the rates now demanded by them on the basis of the rates for the Administrative Block.

Name of Sub Work	Name of item	Market rate worked out as per the present schedule of rate	Rate accepted by the contractors as extra item.	Rate demanded by the contractors for excess quantity over 20%
No. 7	R.C.C.1:2:4 for lintels &c.	4-6-0	4-4-0	7/- Per Cft.
No. 2	Glazed ventilators	6--0-0	6--8-0	9/- Per Sft.
No.1,2&3:	B.B.Superstructure.	130-0-0 with table moulded bricks	129-0-0 with ground moulded bricks	140/-" 100 Cft

It has, therefore, become a problem as to at what rates the claims should be settled as the contractors plead that the schedule of rates are not acceptable to them. They say that they have claimed extra rates over the tendered rates because of the facts mentioned in their note dated 5th May 1952 wherein they have mentioned that the rates increased during the period of the contract. As regards the high rate of Rs.13/- per 100 Cft. for excavation now claimed against Rs. 3/- per 100 Cft. in the contract, they have given the reason that excavation was ordered to be commenced in the midst of monsoon and the work being at the foot of the Yattingud hill, trenches for foundation excavated used to get filled up with rain water making the excavated stuff slushy and difficult to remove and that on account of this

they ....

they had to pay extra to the labourers who would not work in the rains, With regard to this the extra claim is not tenable in view of Note 3 below schedule B of the contract according to which the rates quoted hold good under all conditions, whether etc.

9. To show that the rates claimed by them for the extra quantities are fair and reasonable, the contractors in their letter No.DR-243 dated the 14th July 1952 - copy attached, have stated that the Executive Engineer, Dharwar Division had approached them to take up the work of the Botany Building of the Karnatak College, Dharwar, as the lowest rates received by open compe--tition for the building were 17 % higher than the Administrative Block. In support of this they have quoted Executive Engineer, Dharwar Division's letter No.A-31(a)/1 dated the 21st August 1948 (copy enclosed) However in the Botany Building contract as finally entered into after negotiation vide Para 7 above, the rates of similar items as detailed below are about the same as those in the schedule of rates and so it seems that the schedule of rates should be held to be the market rates then prevalent and the claim should be settled on that basis.

× P'7

P'9

Item	Rate demand--ded by M/s. K.B.Chircha--kar & Co.	Sche--dule rates.	Rate accept--ed in the contract of M/s.Hubli Construction Co.for Botany Building.
1) Excavation for foundation	15--0-0	4-12-0	5--0-0
2) Cement concrete 1:2:4 general	3--8-0	2--8-0	2--8-0
3) Filling in plinth with excavated stuff	9--0-0	3-12-0	5--0-0
4) Foundation C.C.1:4:8	130--0-0	109-8-0	100--0-0
5) Superstructure of B.B. II Sort in cement mortar 1:6	140--0-0	130-0-0 with table moulded bricks.	125--0-0
6) Cement concrete 1:2:4 for R.C.C.work	3-8-0	2-8-0	3--0-0
7) Cement plaster	30-0-0	27-0-0	27--0-0
8) Teak wood	18-0-0	15-12-0	18-0-0

10. In the circumstances orders are solicited as to how the claims of Messrs. K.B.Chircharkar should be settled i.e. whether for purposes of excess (i) each sub work should be taken separately or (ii) all sub works should be grouped together or (iii) whether grouping should be done as suggested by the contractors, and what rates should be adopted as market rates i.e. (a) those claimed by the contractors (b) or those worked out by the Executive Engineer on the basis of schedule of rates of the Division Analysis of rates worked out by the Executive Engineer accompany.

Two statements as detailed below showing the claims of the contractors are submitted herewith. Orders are solicited ....

solicited regarding the basis on which the claims should be settled.

Statement No. 2 showing the claims of the contractors grouping sub works 1 & 2 & 5 & 6 and treating sub works 3,4 & 7 separately (a) at the rates demanded by the contractor according to which the claim amounts to Rs. 34,107-11-0 and (b) at schedule of rates according to which the claim amounts to Rs. 4760-2-0.

Statement No. 3 showing the claims of the contractors putting all the seven sub works together (a) at the ∠demanded ∠rates by the contractors according to which the claim would come to Rs. 21,358--6-0 (b) at the schedule of rates according to which the claim amounts to Rs. 1,340-15-0.

Refund of Security deposit for the --
...

Reference: Your Endt. No. G.34/DD dated 7-6-1952 forwarding copies of G.L., P.W.D.No: BED-1852-W dated 27-5-52 & S.E., S.C's No. G.34/DD dated 2-6-1952.

Para 2 of Government letter:-

Regarding the delay in recording measurements of the above work, I have to state as under:-

The defunct Special Building Construction Sub-Division specially created for the construction of the buildings of the Agricultural College, Dharwar, was closed & amalgamated to the Dharwar B & R Sub-Division on 10-11-1950 A.N.

The project for constructing buildings for the establishment of an Agricultural College, Dharwar consisted of numerous contracts in progress obtained for different sub-works of the project and measurements were to be recorded of intermediate works & paid for monthly as far as the different works progressed.

The amalgamation of the Special Building Construction Sub-Divn., at a stage when all these works had come to an advanced stage of construction coupled with additional works of Dharwar B & R Sub-Dn., contributed mostly to the delay in the voluminous work of recording final measurements of Farm & Dairy Buildings consisting of 26 structures.

I am enclosing herewith a statement showing the works in progress then, from which it would be evident that the delay in recording measurements in connection with the work under reference was mainly due to the stress and strain involved in inspecting & recording the final measurements of several works in progress along with those completed in 1950 with the attendance of the other routine of the Sub-Division. Infact I have done whatever was physically possible in attending to the execution of works, taking intermediate measurements, preparation of the bills & preparation of the various revised estimates due to numerous changes introduced in the original project during construction etc., & the delay may therefore kindly be condoned.

Sd/- S.K.Latnekar,
Deputy Engineer, (On leave).

D.A. - 1 Statement.

57

Office of the
Ex.Engineer, Dharwar Division
Dharwar:28 October 1952.

No.G-34/Dh/1,

To

The Superintending Engineer,
Southern Circle, Belgaum.

Subject: Buildings for the Agricultural College at Dharwar: Farm & Dairy Buildings Part I & II - Delay in taking measurements etc.

Reference: Correspondence resting with this office No.G-34/Dh dt. 20-8-1952.

In enclosing herewith, the copy of the explanation furnished by the Deputy Engineer, under his No P-1,dated 6-10-1952, it may be stated, that after amalgamation of the defunct S.B.C.Sub-Division, when all the thirteen major original works were in the final stage in Dharwar Roads and Buildings Sub Division which is, in fact, the heaviest Sub Division in the Division on account of its numerous buildings required to be maintained, in addition to a total length of about 100 miles A & B Class Roads, it was rather beyond the capacity of the Sub Divisional Officer to record the final measurements of all the completed works at one and the same time in addition to the routine work of B & R Sub-Division. And further on account of general retrenchment in November 1950 and in April 1951, only one Overseer was allowed to continue on this major scheme involving of about Rs.36,00,000/ This has also resulted in delay for recording final measurements and settling the contractor's numerous untenable claims and working out of details of materials accounts etc. Under the circumstances, delay caused in recording the final measurements, which were spread over 400 pages of large size Measurement Book, is not due to the negligence either on the part of the Sub-Divisional Officer or on the part of the Divisional Office; but due to strain caused on account of completion of the buildings and also due to amalgamation and retrenchment as stated above.

Para 3 of G.L.:-(i) Generally the contractors were very irregular in submitting materials accounts. However the Sub-Divisional Officer has submitted detailed account of materials issued and involved in the construction, with the final bills, after taking the aid of the representative of the contractors.

Para 3 of G.L.:(ii): Since works in question were completed in all respects on 30-9-1950, the question of granting further extension to the contractors did not arise and hence no extension was granted after 30-9-1950.

As Shri Latnekar Ex-Deputy Engineer, has recorded all the final measurements of the defunct S.B.C.Sub-Division, one by one and as all of them except Administrative Block have been paid the explanation of the S.D.O. is recommended for acceptance.
